THE 3 METER VIDEO GASTROSCOPE

Designed to Provide Quality Video Imaging

Features:
Video imaging is one of the best instruments in managing your patients' health concerns. JorVet's 3M Video Gastroscope with its quality imaging, user friendly operation, and value is the imaging device for you. Possibilities are endless when a diagnosis is needed. Use this high quality visual aid to help solve your patients' health problems. Using input provided by veterinary practitioners, this endoscope's versatile design and availability in 3M length will specifically meet a wide range of endoscopic needs.

J-568VS

These instruments have proven valuable in:

- Evaluating respiratory problems
- Evaluating upper and lower GI and reproductive tracts
- Evaluating and treatment of Equine Ulcers
- Detecting bleeding sites and strictures
- Visually monitoring medication therapy
- Locating obstructions and parasites
- Removal of foreign bodies

“Ease of use” and high resolution imaging have also been designed into the Video Gastroscope System.
THE VIDEO GASTROSCOPE SYSTEM J-568VS
Versatility and Value for Large Animals and Equine Endoscopy

Suction / Biopsy Channel Size: 2.8 mm
End Tip Deflection: 160° Up / Down, 140° Right / Left
Field of View: 125°
Depth of Field: 15 - 80 mm
Resolution: PAL or NTSC
Insufflation: Automatic Air
Irrigation / Lens Cleaning: Automatic or manual
Light connection: ACMI
Immersability: Exclude Umbilical
Photo Capability: Automatic or manual
Warranty: One Year Standard

JorVet’s versatile Video Gastroscopes have been designed specifically for examinations on large animals such as Bovine and Equine. This endoscope features a high resolution video chip and optics. The device has ergonomically placed automatic air, water and suction valves for easy one-hand use.

This endoscope has four-way articulation for complete tip maneuverability; a large 2.8mm suction biopsy channel for easy instrument passage and suctioning capability; and a unique clean-out port for total channel access and for thorough cleaning and disinfection. The system displays through a high resolution color monitor.

Because we continually upgrade our products, specifications are subject to change without notice. Illustrations may be slightly different than actual.

Purchase Includes:
- Video Gastroscope
- Carrying case
- Video Processor + cables
- Cleaning accessories and brushes
- Water bottle assembly
- Syringe and irrigation tubing
- Leak Tester

Options:
- 150-watt halogen illuminator with automatic air
- Biopsy forceps
- Foreign body retrieval basket
- Foreign body retrieval forceps
- Cytology Brushes
