Designed by a veterinarian

The new practice standard respecting pets and their families

As veterinary professionals, we are expected to adhere to a progressive code of ethical conduct. Placing a beloved pet in a plastic bag is now a choice.

BENEFITS

PROFESSIONAL

Choosing the highest standard available contributes positively to your image, the professionalism of your team and respects the families bond with their pets.

PSYCHOLOGICAL

Your team of professionals will simply feel better using Euthabag.

ECOLOGICAL

Euthabag is suitable for both cremation and burial. It is comprised of recycled material and contains no heavy metals, PVC nor chlorine. It is endorsed by crematoriums.

FINANCIAL

Euthabag fees, like other medical supplies, can be passed on to the client fairly, resulting in no additional cost to your practice while offering the best to your client, patient and veterinary team.

LIABILITY

Preserving an animal's dignity after death is amongst the deontological obligations of the veterinarian. The use of plastic bag for the disposal of deceased pets has been the ground for several veterinary professional complaints.

«I am very thankful to finally have a respectful option to offer clients when their animals have died. Euthabag has made some difficult conversations much easier.»

Dr. L.R., DVM DES., Dipl. ACVIM

«I have always been proud of all the great care we provide for pets and their families. The garbage bag just was not an appropriate end to that relationship. Euthabag fills a void; we could not envision going back.»

Dr. LPdL, DVM, Dipl. ACVIM Oncology

«Euthabag is very affordable and has provided a more peaceful and agreeable way to help the owners and the whole veterinary team during this difficult process.»

Dr. S.K., DVM, IPSAV

With Euthabag we are now able to demonstrate respect and professionalism in EVERY aspect of practice.
