JorVet is proud to offer our 100% active medical-grade Manuka Honey Wound Care Dressings that help maintain a moist wound environment conducive to enhancing wound healing. The high sugar levels of our medical-grade Manuka honey result in osmotic pressure which promotes autolytic debridement of necrotic tissue and rapid reduction in wound malodor.

Extensive research has determined that Manuka honey contains synergistic factors that yield properties to maintain a balanced, moist wound environment. Our Manuka honey contains high levels of Methylglyoxal (MGO) and is standardized for anti-bacterial efficacy and sterilized for safety.

Under the supervision of a veterinary professional, Manuka Honey Wound Care Dressings may be used for:

- Trauma Wounds
- Surgical Wounds
- Ulcerated Wounds
- Infected Wounds
- 1st & 2nd Degree Burns
- Lacerations
- Abrasions
- Hard to Heal Wounds

The low pH of Manuka honey creates an acidic environment conducive to improving wound healing.

The low pH of MANUKA HONEY CREATES AN ACIDIC ENVIRONMENT CONDUCIVE TO IMPROVING WOUND HEALING.

1.5 oz 0.5 oz
MANUKA IG®
- Non-adherent single layer gauze sheet with Manuka Honey
- Light absorbency
- Non-tacky surface

MANUKA IG® MAX
- Non-adherent 3 layer gauze sheet with Manuka Honey
- Light to moderate absorbency
- Easy to apply and remove from wound
- Can be trimmed to smaller sections and remainder stored safely in packaging

MANUKA FOAM® AIR
- Non-adherent absorbent foam pad with Manuka Honey
- Moderate to high exudate absorbency
- Easy to apply and remove from wound

All Manuka Honey Wound Care Dressings protect the wound while creating a moisture balance around the wound that is ideal for healing.
