Calcium Alginate Dressing

Natural product drived from seaweed.

- Absorbs exudate from wound and creates a protective gel and optimal environment
- Can be used on infected wound
- Absorbs approximately 20 times the dressing’s weight
- Protective gel binds exudate and help prevent skin maceration
- Easy dressing to change
- No adhesive primary dressing
- Can be left in place for up to 7 days depending on exudate level
- Box of 12

New Products

**Breathe Warm**

*Heated and Humidified Anesthesia System*

The need for hypothermia prevention during anesthesia is well recognized in veterinary medicine. In addition, loss of moisture during expiration contributes to hypothermia, especially with smaller patients. Medical oxygen is typically dry and cold.

The ability to offer warm and humidified oxygen would be a tremendous benefit to patient’s core temperature.

The **Breathe Warm System** offers a small control unit that warms oxygen to body temp. The addition of a special anesthesia circuit allows for humidification without condensation.

---

**J1532 Breathe Warm Intro Kit**

Intro Kit Includes
- Controller
- Circuit
- Syringe
- Cleaning solution
- Sterile water

$1,990

**J1532A Breathe Warm Anesthesia Circuit Kit**

$59.00

---

**Control Unit Specifications**

- Out temperature range 34°c (93°F) to 45°c (113°F) with 100% relative humidity
- Warm time 15 minutes maximum
- Digital control
- Input flow rate of up to 20 liters/min
- Input voltage 110 AC
- Meets UL 544 standards

---

**Anesthesia Circuit Special Humidifier Design**

- Unilimb or F circuit design
- 100% cotton wick that is specifically designed to saturate quickly and evenly with the use of sterile water via a standard syringe.
- Quick set up time and can operate for 8 hours at 2 LPM
- Cotton wick can be removed and cleaned between uses

$22.00

Anesthesia Circuit Cleaning Brush

Finally a cleaning brush that can clean the inside of an anesthesia circuit reaching inside every recess for a thorough cleaning. It is difficult and expensive to dispose of anesthesia circuit after just one single use. Vet clinics have tried numerous methods to safely clean and sanitize anesthesia circuits between uses. It is not an easy task.

Includes one brush.
• Works well in corrugated tube with a tight fit
• Total reach is 36”, then enter the opposite end to finish the job
• Please note: Easy assembled cleaning rod screws onto soft plastic brush
• Too large for pediatric smaller tubing
• Too large for 19mm scavenger tubing

J1524 Anesthesia Circuit Cleaning Brush
$52.00
